

ALEGRA · CONFIDENTIAL

Quarterly Business Review

2Q26 Performance

▼ LOWLIGHTS

- Dominican Republic performance softened during the quarter following the postponement of the e-invoicing mandate. DGII moved the mandatory deadline to November, removing the main urgency driver for the Facturación segment and slowing acquisition across the full funnel. The Dominican Republic remains a priority for us in H2, where we will concentrate efforts to arrive well positioned ahead of the new deadline.
- Hiring for key roles has been a challenge this quarter. Several candidates for important positions declined offers at the last minute, delaying the onboarding of talent the team needs. We are strengthening our offer-closing process to secure these hires in the coming quarter.

FINANCIAL UPDATE

Alegra closed the first half ahead of plan on every key line, with revenue of \$14.3M (+6.9% vs budget) and ARR reaching \$30.7M, up 31% year over year, confirming that growth is holding at scale. Gross margin held steady at 81.5%, while disciplined spend kept OpEx 6.6% below budget without slowing our investment in product. The result was a decisive profitability inflection: H1 EBITDA swung roughly \$1.5M to reach \$1.43M, lifting margin from -11% a year ago to +10%. Q2 reinforced the trend, with an EBITDA of \$718K — six times plan — and a Rule of 40 of 41%. Just as important, net cash turned positive for the first time in five quarters, closing at \$4.5M. We enter the second half tracking to ~\$30.2M in revenue and ~\$2.9M in EBITDA, both above budget.

◆ HIGHLIGHTS

- We defined our three strategic priorities for H2 2026, focusing the whole organization on three fronts: building our migration machine in Mexico, one that earns accountants' trust; capturing the Electronic Invoicing wave in the Dominican Republic; and delivering a flawless experience across the three ICPs in our four core versions.
- June was the best month of H1 for Mexican accountants on Alegra Connect, with the completion rate for onboarding rising to 83%. This is a significant increase from the 64% average recorded between January and May.
- In Mexico we are tackling the adoption barrier head-on, with leadership on the ground. Through the quarter we sustained a cadence of Alegra Talks with accountants in Mexico City, with direct executive involvement, turning those conversations into hands-on migrations of full client portfolios.
- Costa Rica confirmed the payoff of the ICP model. Despite a 156% surge in New Users that diluted top-of-funnel conversion, every downstream metric strengthened: Q2 SignUps +40%, MQLs +33%, New Logos +24%, and New MRR +31% vs. Q1. The three-segment ICP framework (Soy Pyme, Soy Contador, Alegra ERP) appears to be sharpening lead quality where it matters most — at the close.
- Churn trended down across most ICPs and versions. Retention improved driven by deeper analysis of churn drivers that splits it into three fronts — voluntary, usage deterioration, and failed payments.
- AI Support continued scaling across Customer Experience. The volume of contacts fully resolved by AI rose 63%, raising autonomous resolution from 40% to 70%, and capacity expanded from chat into voice support, moving toward 24/7 coverage. The efficiency gains are freeing operating leverage: we are beginning to redeploy CS talent into other teams while improving response times.
- Alegra Impulsa accelerated during Q2, expanding across our four core versions. In Mexico it is showing clear impact among accountants looking to onboard new SMBs: the migration-with-close-accompaniment model has activated 80% of the accountants enrolled in the program.
- AI Agent — early access, scaling in July. The agent is live in Colombia with early users: ~70 Contadores and ~50 Pymes on the in-product agent, plus 292 admin users via WhatsApp. In July we're opening it to a broader cohort of 500 users to keep gathering feedback and pinpoint the highest-value use cases. Early signal is clear — reporting is the killer use case, so we're concentrating on sharpening those tools first.
- AI is becoming a habit — fastest in Accounting. Two agents now run in production at scale: the CFDI accounting agent nearly doubled its July usage and held at a new baseline of ~850 weekly users, while the payroll-to-journal agent converts at 59%, generating 1,000+ proposed entries. AI is also cutting migration friction — auto-assigning accounting uses on import and restructuring Aspel's chart of accounts into Alegra's standards, lowering the cost to switch off a key competitor.

DISCUSSION TOPIC

Mexico Update

July 2026

THE REFRAMING

Accountants rate Alegra as **clearly superior** — yet hesitate to switch. The blocker is **migration risk + weak post-sale support**, not price.

THE CONSTRAINT

Adoption stalls at the switch, not the sale

Mexican accountant adoption remains below target. They acknowledge Alegra is the better product but won't move their portfolio without migration support and sustained accompaniment.

THE PIVOT ALREADY UNDERWAY

Dedicated migration team + accompaniment

We are shifting the Mexico strategy toward a dedicated migration team to drive activation, full-portfolio migration and retention — not another pricing move.

6.2M

SMBs — total market

~430K

Active accountants

Challenger

Position vs Aspel / CONTPAQi

3 ICPs

Facturación · Contador · ERP

THE QUESTION With the migration bottleneck named, do we stay on the base GTM plan — or fund an aggressive brand/paid bet to break the ceiling? That is the decision on the next slides.

ACQUISITION FUNNEL — SIGN UPS → NEW LOGOS • CR% MEXICO

1 Facturación

Soy Pyme

SMB / freelancer, 1-10 employees. The owner decides.

PAIN SAT rejects CFDIs by wrong code — Excel no longer enough.

2 Soy Contador

Soy Contador

Practice with 5-50 client RFCs. IMCP member, on CONTRAQi by habit.

PAIN Manual DIOT for 10+ RFCs — SAT errors, can't scale.

3 ERP

Alegria ERP

Company 10-150 employees. CFO / manager decides.

PAIN Aspel + CONTRAQi + payroll in 3 systems — month-close takes days.

MODEL Consultative · full-cycle

PRICING Final accountant pricing + invited-SMB offer on the next slide — launches Aug 18. Legacy Multicuenta accountants grandfathered; new plans apply to new sign-ups only (Jakub's coexistence question).

ACCOUNTANT — TIERED BY RFC one pricing variable (client base) · team users always unlimited

Inicia

up to 10 RFCs

\$490 /mo

covers 66% of firms

Despacho

up to 30 RFCs

\$990 /mo

covers 87% · no price-migration friction

Firma

up to 75 RFCs

\$1,990 /mo

covers 96% of firms

Premium

75+ RFCs

Custom

large portfolios · by blocks (top 4% of payers)

· **Unlimited team users** (never per person) · **Unlimited free company loading** · Extra RFCs: blocks of 25 for \$500 · Reassign 1x/month · MXN, excl. VAT

INVITED SMB "a free user for your client"

\$0 Free for the client — covered by the accountant's tier

- CFDI invoicing covered (fair use, no visible cap)
- 1 SMB user · mobile app + client portal
- Basic reports + tax-status certificate

Wants business capabilities? → catalog plan

- Inventory, banking, POS, more users: Invoicing / Management / POS
- Paid by the SMB or accountant — doesn't consume the tier's quota
- Invoicing stays covered. This is the monetization lane.

TODAY'S BASE small & protected · SMB activation still untapped

244

Accountants paying Multicuenta today — kept on original terms

~4K

SMBs created across their portfolios

<100

SMBs invoicing on their own — the activation gap

New pricing applies to new sign-ups only. The 244 keep their current plan and price; they migrate only if they choose a higher tier.

S1-3

Foundation

Alegra Connect MX, accountant communities

WHAT WE RUN — BASE CHANNELS

- 🎯 **Performance:** Google Search (SAT/CFDI intent), Meta + TikTok for Facturación, LinkedIn for Soy Contador / ERP with the Aspel-savings calculator.
- 🔍 **Content + AEO:** be the digital fiscal authority — rank in Google and be cited in ChatGPT/Perplexity for MX fiscal queries.
- 📣 **Brand Amplification:** fiscal influencers (SAT/finance creators), IMCP institutional alliance to reach ~430K accountants.
- 📦 **Product Marketing:** differentiated onboarding + nurturing per segment, MX-localized help center (CFDI v4.0, DIOT, IMSS).

SEO / AEO

Google Search

Meta · TikTok

LinkedIn CFOs

Fiscal influencers

IMCP alliance

Alegra Connect MX

SDR full-cycle

NORTH METRICS — WHAT ACTUALLY COUNTS

- ⚡ **First value, not signups.** Golden rule: a registration that doesn't emit its first CFDI / DIOT is a number, not a lead.
- ✅ **Activation D+7 > 40%** in each segment · onboarding completion > 60%.
- 👤 **Soy Contador depth:** > 8 active RFCs per accountant by month 3 — the migration signal.
- 🛡️ **Retention:** annual churn < 15% blended · payback < 8 months · measured per segment, never blended-only.

AXIS Every play routes back to migration: acquisition brings the accountant, migration + accompaniment converts their portfolio. That is where the ceiling is.

Path A stay the course · **Path B** fund an aggressive push — no MX software competitor does OOH. Experimental portfolio mapped by **execution risk x impact**:

DISCUSSION TOPIC

Growth Ambition & Brand Investment

Open discussion — how aggressive to be with growth: stay the course or place a large brand/paid bet, and where it would pay off most.

FINANCE

Tax, Transfer Pricing & M&A Summary

June 2026

US\$2.71M

Tax loss carryforward

US\$1.99M

Projected income tax 2026

US\$1.00M

Adjusted projected income tax — Alegra 2026

Accumulated payments (2013–2025). The Group has paid US\$847K in cumulative cash tax from 2013 through 2025 — including a US\$789,001 one-off foreign withholding on intercompany payments with Soluciones Alegra SAS, triggered by a DIAN information requirement, plus US\$6,802 in U.S. income tax. US\$825K in credit balances (mainly Soluciones Alegra, US\$821.2K) carried into 2026.

ACTIVE TAX STRATEGY — 3 INITIATIVES**1****Colombia CTel 165% Super-Deduction**

Reduces Colombian income tax ~27%, no incremental product spend.

2**Panama Migration — Int'l Version**

Moves int'l product to Panama entity; eliminates ~US\$8–11K/yr U.S. tax and 2025-style withholding exposure.

3**Active Credit-Balance Management**

US\$825K recovered at 2025 close, further US\$457K projected for 2026 close — frees working capital.

Why we restructured. The prior cost-sharing model (2022–2025) lacked strategic direction, leaked tax through inefficient withholding/double-taxation management, didn't capture the value of the Alegria software, and had weak arm's-length documentation. New direction: rebuild around the Alegria intangible itself — a DEMPE-based structure, defensible under OECD transfer pricing guidelines.

THE 2026 MODEL — FOUR INSTRUMENTS

The Alegria intangible is the single center of gravity for the entire model.

5 of 10 entities project a fiscal loss in 2026

Holdings, Alero, Mexico, Peru and Spain.

US\$2.7M in accumulated loss carryforwards

Across 8 entities — terms range from 3 years (Costa Rica) to unlimited (Spain).

Treaty gap. The Dominican Republic concentrates 85% of the Group's 2026 cash tax but holds treaties only with Spain and Canada — outbound royalty/service payments face up to 27% withholding with limited or no credit. **Decision rule:** place discretionary cost where the nominal rate is $\geq 30\%$ and profit exists to absorb it — a dollar deducted is worth 35¢ in Colombia vs. 27¢ in the Dominican Republic.

ROYALTY WITHHOLDING BY RECEIVING JURISDICTION (2026)

JURISDICTION	DOMESTIC RATE	TREATY RATE	APPLICABLE
Argentina	35% (pres.)	10% (CDI)	10%
Spain	24% (IRNR)	10% (CDI)	10%
United States	30% (FDAP)	10% (CDI)	10%
Peru	34%	— (creditable)	34%
Dominican Rep.	27%	n/a	27%
Panama	12.5%	n/a	12.5%

PIPELINE FUNNEL — CUMULATIVE SINCE 2025 LAUNCH

10 processes closed or paused — ~60% due to lack of genuine seller intent. Largest driver of wasted resources across the pipeline to date.

ACTIVE TARGETS — 3 COMPANIES IN PIPELINE (ALL MEXICO)

TARGET	STAGE	STATUS
Tesk	Due Diligence	Awaiting data room from founder; follow-up sent July 24
NominaX	Contacted	No response since June 2026 — evaluating alternative channels
Contalinea / SICOSS	Contacted	Outreach June 2026 — deciding whether to insist on contact

M&A FINANCING STATUS

BBVA Spark — Credit Line Expansion

Interim financial statements (as of June 2026) submitted July 21; currently under BBVA review.

Endeavor Network

Leveraging Endeavor connections to explore alternative investor networks and funding sources.

IMMEDIATE NEXT STEPS — Q3 2026

- 1 Secure requested due diligence documentation from Tesk
- 2 Execute secondary outreach for NominaX and Contalinea
- 3 Prepare groundwork for late-2026/2027 reactivation of Helisa, TNS and Cashflow

Lessons from closed processes: CalcImp (MX) reached DD, buyer withdrew before sharing data; Factúrele (CR) completed DD, Investment Committee opted not to proceed; Helisa (CO), TNS (CO) and Cashflow (DO) paused on timing, earmarked for 2027 reactivation.

COMMENTS

- Cash balance closed Q2 at **\$4,502K**, exceeding Budget by **+\$2,535K (+128.9%)**. Highest balance of 2026.
- **Net Operating CF +\$555K** for the quarter — inflows +\$606K above plan (Subscriptions +\$573K), outflows -\$80K below budget.
- Biggest overs vs budget: **Taxes +\$324K**, Credit Card +\$544K (unbudgeted), General +\$100K. Biggest savings: Paid Media -\$303K, Software & Tools -\$225K, Payroll -\$411K.
- **Net Increase in Cash +\$290K** after -\$265K of other financing / non-operating outflows.

Cash recovery consolidates — Net CF turned positive in Q2 2026 (+\$405K) after five straight quarters of decline

Cash Balance & Net CF · Quarterly Q1'25–Q2'26 06 / 06

CASH BALANCE — QUARTERLY Q1 2025–Q2 2026 (\$K)

— Actual — Budget 2026

NET CF QOQ — QUARTERLY Q1 2025–Q2 2026 (\$K)

■ Net accumulation ■ Net burn

- Q2'26 closes at **\$4,502K, +\$2,535K above budget (\$1,967K, +128.9%)**. Highest quarter-end balance since Q1'25.
- **Steady decline from Q1'25 (\$5,434K) to Q1'26 (\$4,097K)** — five straight quarters of net cash burn — reversing in Q2'26 (+\$405K).

- **Five consecutive quarters of cash burn:** Q1'25 -\$541K → Q2'25 -\$348K → Q3'25 -\$275K → Q4'25 -\$588K → Q1'26 -\$126K.
- **Q2'26 Net CF: +\$405K**, the first positive quarter since Q1'25 — reflecting the operational cash generation captured in Slide 5.

Mention distribution — Alegra consolidated

Product quality

~105 · 41%

Recurring errors, system outages, slowness in billing and sales, bugs in inventory, decimals, and accounting. Issues worsen after updates. In POS, directly impacts the point of sale in real time.

Support and customer service

~55 · 21%

Slow responses, automated support without real resolution, no phone channel, post-sale abandonment. Entrepreneur plan especially underserved. Users feel they pay but have no one to turn to.

Pricing and cost-value ratio

~51 · 20%

Plans perceived as expensive for small businesses, price increases without prior notice, core features locked behind higher-tier plans, billing amount limits that feel unjustified.

Missing or limited features

~34 · 13%

CRM, purchase orders, improved payroll, flexible reports, local tax compliance (RESICO, DGII, SUNAT), more complete mobile app, bank integration, quotes, and invoice customization.

Usability and overall experience

~13 · 5%

Unintuitive navigation, complex flows, changes without notification, perception of a closed or hard-to-configure system.
