Monthly Business Review

August 2026 Performance

▼ LOWLIGHTS

- Accountant activation dropped 10 pp, from 43% to 33%, as newly onboarded accountants are not being activated immediately within the Alegra Impulsa flow.
- Top-of-funnel volume is not translating into logos. Colombia delivered 86% of its Contactables target but only 54% of Logos, while Mexico delivered 150% of Contactables and 71% of Logos.
- Global Agent adoption remains close to zero after two months in beta, with limited movement during August and only a partial recovery in the final week.
- Nurturing flow activation and lead scoring errors disrupted conversation assignment during the first two weeks of August, running close to \$3K USD below the weekly average before recovering.

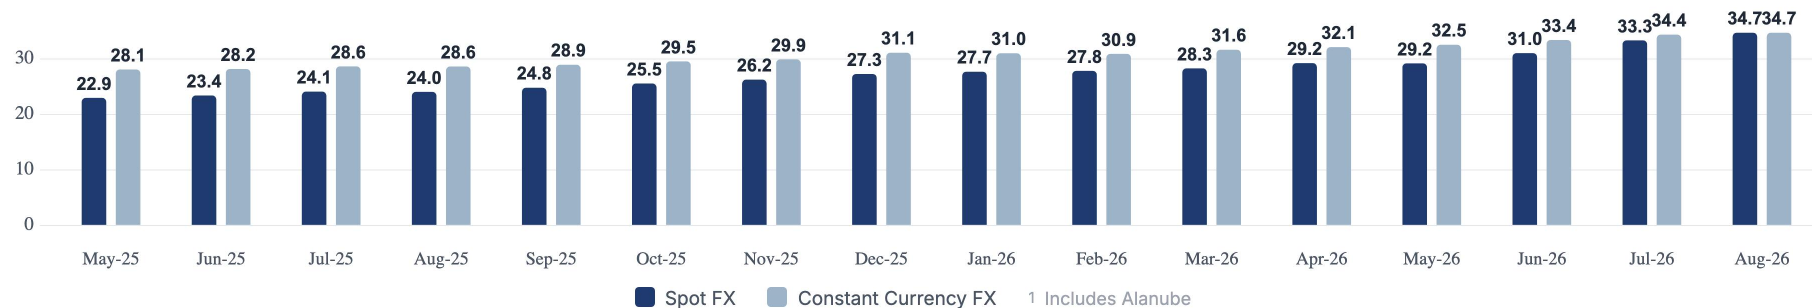

FINANCIAL UPDATE

August delivered another strong month, with revenue of \$2.86M coming in 13.4% ahead of budget and up 42.1% year over year, while gross margin held steady at 81.4%. EBITDA reached \$353K, nearly three times the budgeted \$123K, for a 12.3% margin. Cash closed at \$4.98M, the highest balance of the year and well above plan, supported by seven straight months of positive net change. Year to date, operating expenses have fallen to 70.4% of revenue from 89.5% a year ago, and ARR now stands at \$34.7M, growing 44.4% year over year. Holding budget through year end, we project FY26 revenue of \$30.8M and EBITDA of \$3.4M, both comfortably ahead of plan.

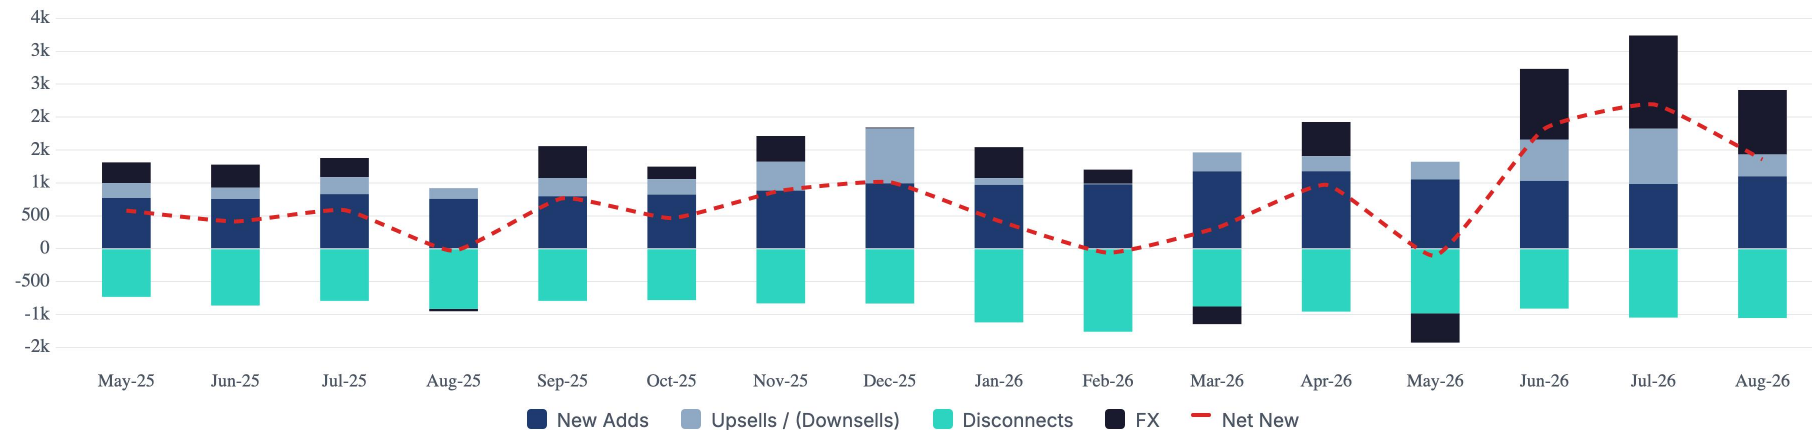

◆ HIGHLIGHTS

- Global logo churn improved to 3.8% from 3.9%, sustaining the favorable trend of recent months with a projected reduction in Churn MRR.
- Organic channels are now growing on their own, with SEO, Direct Traffic and Lead Nurturing expanding logos in parallel (+13%, +5%, +21%), shifting organic from a fallback to a primary growth engine.
- Mexico's ICP is now defined, focusing product and go-to-market priorities in a market where paid acquisition efficiency is the binding constraint.
- Catalog migration is now fully covered in Mexico. Aspel and Contalink were closed with AI that rebuilds and corrects the accounting catalog, completing the three migration routes of the market alongside Contapaq.
- Alegra won the Digital Transformation category at Premios Portafolio 2026, one of Colombia's most established business awards, with 10 tier-1 press placements reinforcing our positioning as a technology-led platform in the market.
- Customer Success strategy launched with a pilot in Mexico, with over 50 users through the model in its first three weeks and a focus on reducing churn within the first 3 months of the lifecycle.

Splitting the old "Net Upgrades" bucket into cross-sell, upsell and disc&other surfaces something a blended number hid: Mexico's Net Upsell is the only negative value in the table, -2.1pp — paired with the smallest FX tailwind of the three currencies that get one (+7.4pp, versus Colombia's +25.3pp), it's the version pulling group NDR down to 85.8%. Dominican Republic and Costa Rica get no FX effect at all and post the two lowest NDRs (79.1% and 79.9%), while Colombia's outsized FX tailwind pushes it to the only NDR above 100%, 111.6%.

Net Upsell has fallen every August for three straight years — +11.4pp (Aug-23) → +6.7pp (Aug-24) → +4.7pp (Aug-25) → +2.7pp (Aug-26), a -8.7pp structural decline. Spot NDR looks like it's back where it started (100.1% → 101.0%), but the composition flipped: three years ago the headline number was upsell-driven, today it's FX-driven — FX went from +4.8pp to +16.6pp, more than offsetting the upsell collapse.

COMMENTS

- **S&M represents 29.7% of Revenue YTD** — a 15.1pp reduction vs YTD Aug 2025 (44.8%). Spend declined 11.0% YoY while Revenue grew 34.3%, driven by continued Paid Media and Team efficiencies (\$598K below budget YTD).
- **R&D represents 26.4% of Revenue**, essentially on budget (−0.2%) with YoY growth of 28.6% reflecting sustained product investment — below the 34.3% revenue growth.
- **G&A represents 14.3% of Revenue**, below budget (−3.0%) and down 2.9pp YoY as a share of revenue, even as G&A dollars grew 11.9% — well below the 34.3% revenue growth.
- **Total OpEx % of Revenue dropped from 89.5% to 70.4% YoY** — a 19.1pp improvement driving EBITDA expansion from −8.3% to +11.3%.

COMMENTS

- Cash balance closed August at **\$4,979K**, exceeding Budget by **+\$2,890K (+138%)** — the highest balance of 2026, 8th consecutive month above budget.
- **Net Operating CF +\$360K** vs a budgeted −\$44K (+\$404K swing) — Inflows +\$290K over budget (subscriptions collection ahead of plan, consistent with the +13.5% revenue beat) more than covered a favorable −\$114K Outflows underspend.
- **Software & Tools −\$107K vs budget** and **Paid Media −\$102K** the biggest savings, alongside Payroll −\$82K, more than offsetting **Taxes +\$122K** (tracks the higher COL/MEX revenue, per Collections' notes) and **Freelance +\$28K**.
- **Credit Card +\$149K** has no budget line (unbudgeted spend category). Jun 26's closing balance was revised from \$4,446K to **\$4,502K** in the latest tracker version — see Slide 1 footnote.

Wallet share drops with portfolio size (41% for 1-5 → 13% for 15+), but the large accountants are the most valuable: more multi-client (56% with 2+ logos) and lower churn (3.2%). The lever is capturing more of the large portfolios. And there are **6,674 "Not declared" accountants** — more than all the others combined — that we can't even measure wallet share on. *Pick a metric above to see its trend by range.*

Churn is almost entirely a single-logo event: 98% of it is 1-paid-logo accountants (443 of 450). Accountants with 2+ paid logos barely leave (7 / 0 / 0). Upsell and downsell cancel out (116 each), so on net accountants aren't climbing tiers — the base stays dominated by fragile single-logo accountants.
